MEMORANDUM FOR : Director of Material

SUBJECT : Airlift for Move to Germany

25X1A

1. Detachment A estimates that equipment to be moved forward from [REDACTED] to a German base to permit the start of operations in Germany will add up to one full load for a C-124. I have seen no careful estimate of the cargo list required from the ZI but understand that it may total two C-124 loads. I assume the major items are a mobile GCI unit and the substitute control tower which has been built by our Comms Office. If this requirement has not been firmed up, it should be promptly.

2. I believe it essential that the above requirements for airlift be levied upon the Air Force. Presumably this will require consultation with Col. Berg. SAC will also be involved. I request that you set this matter in motion and advise me as soon as possible what arrangements are being made.
